

Herefordshire Group Training Association

Gate Machinery is regarded as a preferred supplier by Herefordshire and Worcestershire Group Training Association. They are trusted within our organisation to provide advice, sales and support to develop our engineering training business. The Gate team have taken the trouble to visit our sites to understand our business to ensure their advice is appropriate to our long term plans.

Like most businesses we require the best return from capital investment aiming to get most for our money without jeopardising quality over the long term. We review the market for machine tools regularly and for product quality, cost, delivery and after sales find no reason to go elsewhere.

During the creation of a new 15,000 sq. ft. training facility Gate met every delivery and commissioning deadline. Back-up and after-sales service has always been delivered in an efficient and friendly manner.
